

TEST CASES

User Story ID / Title	1 / The User can login to the System through his / her account.	Priority : <N>
Type of Test	Black box	
Purpose of Test	Checks if the System allows the User to login through his / her account.	
Test Case #	1 - 1	
Objective of Test Case	Checks that the System will not accept if the email and password fields are empty.	
Input	Email: Password:	
Expected Results	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	
Actual Results	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should be editable and should accept new inputs. 	
Conclusions	SUCCESS	
Remarks		
Test Case #	1 - 2	
Objective of Test Case	Checks that the System will allow leading spaces in email and the password is correct.	
Input	Email: <space><space><space>sample_email@gmail.com Password: sample_p@ssword!	
Expected Results	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	
Actual Results	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	
Conclusions	SUCCESS	
Remarks		

To Upload – User Story 1

Test Case #	1 - 3
Objective of Test Case	Checks that the System will allow trailing spaces in email and the password is correct.
Input	Email: sample_email@gmail.com<space><space><space> Password: sample_p@ssword!
Expected Results	<ul style="list-style-type: none"> • The User will be able to login successfully. • The System will direct and display to the User his / her main page. • Check that the System will not make the email and password of the User be visible in the page url.
Actual Results	<ul style="list-style-type: none"> • The User will be able to login successfully. • The System will direct and display to the User his / her main page. • Check that the System will not make the email and password of the User be visible in the page url.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 4
Objective of Test Case	Checks that the System will not allow middle spaces in email and the password is correct.
Input	Email: sam<space>ple_email<space>@<space>gmail.com Password: sample_p@ssword!
Expected Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "Enter your email address and password. • The email and password fields should also be highlighted in red. • The email and password fields should be editable and should accept new inputs.
Actual Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "Enter your email address and password." • The email and password fields should be editable and should accept new inputs.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 5
Objective of Test Case	Checks that the System will allow the User to login if the email matches with the password in the database.
Input	Email: correct_email@gmail.com Password: correct_p@ssword!
Expected Results	<ul style="list-style-type: none"> • The User will be able to login successfully. • The System should direct and display to the User his / her main page. • The System should not make the email and password of the User be visible in the page url.
Actual Results	<ul style="list-style-type: none"> • The User will be able to login successfully. • The System will direct and display to the User his / her main page. • Check that the System will not make the email and password of the User be visible in the page url.

To Upload – User Story 1

Conclusions	SUCCESS
Remarks	
Test Case #	1 - 6
Objective of Test Case	Checks that the System will not allow the User to login if the entered email does not matches with the entered password using the database or vice versa
Input	Email: correct_email@gmail.com Password: wrong_p@ssword!
Expected Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "The email or password you entered is incorrect." • The email and password fields should also be highlighted in red. • The email and password fields should be editable and should accept new inputs.
Actual Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "The email or password you entered is incorrect." • The email and password fields should be editable and should accept new inputs.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 7
Objective of Test Case	Checks that the System will not allow the User to login if the email field is empty.
Input	Email: Password: correct_p@ssword!
Expected Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "The email or password you entered is incorrect." • The email and password fields should also be highlighted in red. • The email and password fields should be editable and should accept new inputs.
Actual Results	<ul style="list-style-type: none"> • The User will still be in the Login screen. • The System will inform the User a message: "The email or password you entered is incorrect." • The email and password fields should be editable and should accept new inputs.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 8
Objective of Test Case	Checks that the System will not allow if the password field is empty.
Input	Email: correct_email@gmail.com Password:

To Upload – User Story 1

Expected Results	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: “Enter your password.” The password field should also be highlighted in red. The email and password fields should be editable and should accept new inputs.
Actual Results	<ul style="list-style-type: none"> There was a run-time error.
Conclusions	FAIL
Remarks	
Test Case #	1 - 9
Objective of Test Case	Checks that the System will allow simultaneous login of multiple different Users on different web browsers.
Input	<p>FIREFOX (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p> <p>GOOGLE CHROME (User 2) Email: correct_email2@gmail.com Password: correct_p@ssword2!</p>
Expected Results	<ul style="list-style-type: none"> All the Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the Users be visible in the page url of both browsers.
Actual Results	<ul style="list-style-type: none"> All the Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the Users be visible in the page url of both browsers.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 10
Objective of Test Case	Checks that the System will allow simultaneous login of the same User on different web browsers.
Input	<p>FIREFOX (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p> <p>GOOGLE CHROME (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p>
Expected Results	<ul style="list-style-type: none"> The User should be able to login successfully on both web browsers. The System should direct and display to the User to his / her main pages on both browsers. The System should not make the emails and passwords of the User be visible in the page url on both browsers.

To Upload – User Story 1

Actual Results	<ul style="list-style-type: none"> The User should be able to login successfully on both web browsers. The System should direct and display to the User to his / her main pages on both browsers. The System should not make the emails and passwords of the User be visible in the page url on both browsers.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 11
Objective of Test Case	Checks that the System will allow login of multiple different Users on different web browsers though not necessarily simultaneous.
Input	<p>FIREFOX (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p> <p>[After 10 minutes...]</p> <p>GOOGLE CHROME (User 2) Email: correct_email2@gmail.com Password: correct_p@ssword2!</p>
Expected Results	<ul style="list-style-type: none"> All the Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the Users be visible in the page url of both browsers.
Actual Results	<ul style="list-style-type: none"> All the Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the Users be visible in the page url of both browsers.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 12
Objective of Test Case	Checks that the System will allow login of the same User on different web browsers though not necessarily simultaneous.
Input	<p>FIREFOX (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p> <p>[After 10 minutes...]</p> <p>GOOGLE CHROME (User 1) Email: correct_email1@gmail.com Password: correct_p@ssword1!</p>

To Upload – User Story 1

Expected Results	<ul style="list-style-type: none"> The two Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the two Users be visible in the page url on both browsers.
Actual Results	<ul style="list-style-type: none"> The two Users should be able to login successfully. The System should direct and display to each of the Users their own respective main pages. The System should not make the emails and passwords of the two Users be visible in the page url on both browsers.
Conclusions	SUCCESS
Remarks	
Test Case #	1 - 13
Objective of Test Case	Checks that the System will not allow to login if the password entered contain extra spaces.
Input	Email: correct_email1@gmail.com Password: <space>correct_p@ssword1!<space><space>
Expected Results	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "The email or password you entered is incorrect." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs.
Actual Results	<ul style="list-style-type: none"> The User was able to login successfully.
Conclusions	FAIL
Remarks	
Test Case #	1 - 14
Objective of Test Case	Checks that the System will not allow a User to login using a direct url without logging into application.
Input	FIREFOX Email: correct_email1@gmail.com Password: correct_p@ssword1! Url: http://JobIT.com/client=#/Profile=John/webhp?sourceid=chrome-instant&ion=1&espv=2&es_th=1&ie=UTF-8#q=importance%20of%20 software%20n [Copies the url and paste it in GOOGLE CHROME...]
Expected Results	<ul style="list-style-type: none"> The User should not be able to login successfully. The System should direct and display the User to the home page of the website.
Actual Results	<ul style="list-style-type: none"> The User should not be able to login successfully. The System should direct and display the User to the home page of the website.
Conclusions	SUCCESS

TEST CASES

User Story ID / Title	4 / The User can choose how to receive notifications.	Priority : <N>
Type of Test	Black box	
Purpose of Test	Checks if the System allows the User to choose how to receive notifications.	
Test Case #	4 - 1	
Objective of Test Case	Checks that the System will not allow the User to go to the page using direct url without logging into application	
Input		
Expected Results	No mode of notification will be set to the user. User will be notified to log-in properly before being able to access the feature. No new content will be stored in the database.	
Actual Results		
Findings		
Test Case #	4 - 2	
Objective of Test Case	Checks that the System will not allow the User to choose how to receive notifications if the password field is empty.	
Input		
Expected Results	No mode of notification will be set to the user. The user will be notified that no input was made. The user can choose a mode of notification. No new content will be stored in the database.	
Actual Results		
Findings		
Test Case #	4 - 3	
Objective of Test Case	Checks that the System is password space-sensitive.	
Input		
Expected Results	Passwords following the password restriction will be allowed. Invalid passwords will not be verified with the database. Invalid password input will not allow access to the system and its features.	
Actual Results		
Findings		

To Upload – User Story 4

Test Case #	4 - 4
Objective of Test Case	Checks that the System will not allow the password to be copied and pasted.
Input	
Expected Results	User will be notified that, copying and pasting passwords is not supported. User will be notified to input his/her password. All inputs will be verified.
Actual Results	
Findings	

TEST CASES

User Story ID / Title	5 / The User can log out of the System.	Priority : <N>
Type of Test	Black box	
Purpose of Test	Checks if the System allows the User to log out of the System.	
Test Case #	5 - 1	
Objective of Test Case	Check that the System will not allow the back button to push the User to his / her logged in page just after he / she logout from his / her specific account.	
Input	FIREFOX Email: correct_email1@gmail.com Password: ***** [Logouts...]	
Expected Results	<ul style="list-style-type: none"> The System should not allow another User to access the account of the previous User just by going back even the previous User has logged out. The System will just direct the User to the home page. 	
Actual Results		
Findings		
Test Case #	5 - 2	
Objective of Test Case	Check that the System will not allow the back button to push the User to his / her logged in page just after he / she logout from his / her specific account.	
Input	FIREFOX Email: correct_email1@gmail.com Password: ***** [Logouts...]

TEST CASES

User Story ID / Title	19 / The Admin/Super Admin can log-in to the System to have access to the System.	Priority : <N>
Type of Test	Black Box	
Purpose of Test	Checks if the software can allow admin access to the system.	
Test Case #	19 - 1	
Objective of Test Case	Checks if the software will not accept invalid key combinations	
Input	Up, up, down, left, right (an invalid admin key combination)	
Expected Results	The software will not redirect the user to the admin special log-in page.	
Actual Results	User was not redirected to the admin sign-in page. User still sees the default sign-in page.	
Findings	The software correctly validates the admin key combination input made by the user. Appropriate results are shown depending on the inputs made by the user. Any user except the admin can't just access the admin features of the system.	
Conclusion	PASS	
Remarks	There should only be 1 admin key combination existing.	
Test Case #	19 - 2	
Objective of Test Case	Checks if the software will accept valid key combinations	
Input	up,up,down,down,left,right,left,right,b,a(a valid admin key combination)	
Expected Results	The user will be redirected to the admin log-in page to allow access to the system.	
Actual Results	The user was redirected to the admin sign-in page. The user can now sign-in as an admin. The user can input username and password for the final stage of the admin sign-in process.	
Findings	The software was able to identify the valid admin key combination inputted by the user.	
Conclusion	PASS	
Remarks	This should be the ONLY admin key combination existing unless specified by the client.	
Test Case #	19- 3	
Objective of Test Case	Checks if the software can correctly verify correct inputs with the contents of the database	

To Upload – User Story 19

Input	(Valid Username & Password = Existing in the database) Email : experts.prime@yahoo.com Password : experts!
Expected Results	The user should be able to access the admin page and it's features. The admin user should be able to access his/her account. The system must deem this values as valid.
Actual Results	Admin Sign-in Successful. The user was redirected to the Company Account Registration. The admin user can now create company accounts for their partners.
Findings	The system was able validate and allow a valid admin username & password. The system was able to counter check inputs with database contents correctly.
Conclusion	PASS
Remarks	All Admin related Username & Password should be able to successfully log-in during admin log-in.
Test Case #	19 - 4
Objective of Test Case	Checks if the software can correctly verify incorrect inputs with the contents of the database
Input	E-mail : russelandrade03@gmail.com Password : russel03
Expected Results	Admin Log-in Unsuccessful. The user will be notified regarding invalid admin username & password input. The user will not be able to access the admin page and all its features The user may opt to input new values for each fields
Actual Results	Admin Log - in unsuccessful. The user was notified regarding invalid admin username & password input. The user was not redirected to the admin page. The user may opt to input new values for all input fields.
Findings	The system was able to validate inputs successfully with the database contents.
Conclusion	PASS
Remarks	Company and Applicant deemed username & password must be used as input.
Test Case #	19 - 5
Objective of Test Case	Checks if the software can correctly verify incorrect inputs with the contents of the database given the password input is wrong
Input	Username : applicant2341 Password : experts (Valid password contain the “!” character)

To Upload – User Story 19

Expected Results	Admin Log-in unsuccessful. The user will not be notified that the password input is wrong. He/She will not able to access the admin page and all its features The user may opt to input new values for all input fields.
Actual Results	Admin Log-in unsuccessful. The user was not able to access the admin page. The user had an option to input new values for all input fields.
Findings	The system can validate invalid inputs for all input fields.
Conclusion	PASS
Remarks	Remove atleast one of the characters in any of the inputs. Missing characters must not be deemed as a valid admin user.
Test Case #	19-6
Objective of Test Case	Checks if the software can correctly verify non-existing inputs with the contents of the database
Input	Username : applicant241(This username is not stored in the database) Password : @NotValidPls(This password is not stored in the database)
Expected Results	Admin Log-in unsuccessful. The user was not redirected to the admin page. He/She will not able to access the admin page and all its features The user may opt to input new values.
Actual Results	Admin Log - in unsuccessful. The user was not redirected to the admin page. The user had an option to input new values.
Findings	The system can validate non existing data inputs.
Conclusion	PASS
Remarks	Input any non-existing username & password values. Inputs that are not found in the database must not be stored not unless during registration.
Test Case #	19-7
Objective of Test Case	Checks if the software can verify matching username and password.
Input	(This data exist and belongs to one person) Username : experts.prime@yahoo.com Password : experts!
Expected Results	Admin Log-in Successful The user will be notified of successful log-in. The user was redirected to the admin page. He/She will be able to access admin page and its features.

To Upload – User Story 19

Actual Results	Admin Log-in successful. The user was able to access the admin page. The user has access to the admin features.
Findings	The system can validate matching inputs.
Conclusion	PASS
Remarks	Username & Password that belong to a single person must be used as an input.
Test Case #	19-8
Objective of Test Case	Checks if the software can verify not matching username & password
Input	(This data exist but the username & password does not belong to the same person) Username : experts.prime@yahoo.com Password : russel03
Expected Results	Admin Log-In Unsuccessful. The user will be notified that the username & password does not match. He/She will not be allowed to access the admin page and its features. The user may opt to input new values for all fields.
Actual Results	Admin Log-In Unsuccessful. The user was not allowed to access the admin page and its features. The user had an option to input new values for all fields.
Findings	The system can validate inputs not belonging to a single person.
Conclusion	PASS
Remarks	Username & Password inputs must belong to different users.
Test Case #	19-9
Objective of Test Case	Checks if the software will not allow an all blank inputs
Input	Username : (null) Password : (null)
Expected Results	Admin Log-In Unsuccessful. The user will be notified that he/she did not entered any input. He/She will not be allowed to access the admin page and its features. The user may opt to input values for all fields.
Actual Results	Admin Log-In Unsuccessful. The user was notified that he/she did not entered any input. He/She was not allowed to access the admin page and its features. The user had an option to input values for all fields.
Findings	The system can check for null inputs
Conclusion	PASS

To Upload – User Story 19

Remarks	-----
Test Case #	19-10
Objective of Test Case	Checks if the software will not allow a blank username input
Input	Email : (null) Password : experts!
Expected Results	Admin Log-In Unsuccessful. The user will be notified that one of the input does not have any value. He/She will not be allowed to access the admin page and its features. The user may opt to input values for the blank field.
Actual Results	Admin Log-In Unsuccessful. The user was notified that one of the input does not have any value. He/She was not allowed to access the admin page and its features. The user had an option to input values for the blank field.
Findings	The system can check for null inputs in any of the fields.
Conclusion	PASS
Remarks	-----
Test Case #	19-11
Objective of Test Case	Checks if the software displays the correct admin information upon successful log-in
Input	Email : experts.prime@yahoo.com Password : experts!
Expected Results	Admin Page must be shown. Correct admin details must be shown in the page. All admin features must be accessible to the user.
Actual Results	Admin page was shown. Admin E-mail was shown. The admin Create Company Account was shown.
Findings	The system can validate valid admin inputs but not all Admin Details stored in the system was shown.
Conclusion	FAIL
Remarks	Admin should be able to see his/her admin profile with complete details upon successful log-in process.
Test Case #	19-12
Objective of Test Case	Checks if the software will not allow access to admin features given one of the characters in the key combination is wrong
Input	Key : Up, up, down,down, left,right,left, right, b, c

To Upload – User Story 19

Expected Results	Admin Log-in page must not be shown. The user may opt to log-in as an applicant or a company. The user may input new key combinations.
Actual Results	Admin Log-in page was not shown. The user had an option to log-in as an applicant or a company. The user may input new key combinations.
Findings	The system can validate incorrect key combinations.
Conclusion	PASS
Remarks	Key Combination check must be strict as this is vital to the data security of the company.
Test Case #	19-13
Objective of Test Case	Checks if the software restricts access to the admin features if one of the password input character is wrong.
Input	Username : experts.prime@yahoo.com Password : expert!
Expected Results	Admin Page must not be shown. Admin features must not be accessible. The user will be notified that the password did not match any valid admin password.
Actual Results	Admin Page was not shown. Admin features was not accessible to the user. The user had an option to re do his/her log-in as an admin.
Findings	The system can validate incorrect inputs.
Conclusion	PASS
Remarks	Checking must be strict as this is for the security of a user.
Test Case #	19-14
Objective of Test Case	Checks if the software will not validate cancelled admin log-in
Input	Username : experts.prime@yahoo.com Password : experts! Refresh Button invoked
Expected Results	Admin log-in unsuccessful. The user will be notified that an admin log-in was cancelled. The user will not be able to access the admin page.
Actual Results	No Effect since there was no cancel feature implemented for the admin log-in page.
Findings	Cancel Feature was not implemented. User will need to press back on the browser to gain access to the default log-in page.
Conclusion	FAIL
