

TEST SCRIPTS

TEST ID : 19 - Admin Login									
Designed By : Russel Andrade					Module or Screen : Admin Login Screen				
Test Data Source : User data entry					Objectives : To test if registered admin can log in to the system.				
Test Case #	Description	Test Steps	Expected Results	Actual Result	Performed By/ Date				
19-1	Invalid Admin Key Combination	In the input admin key page : 1.The admin should input up, down,left right	Upon completing the steps : - Verify that an error message is shown indicating the invalidity of the key combination. - Verify that the key combination inputted by the user is not valid - The admin log-in page should not be shown	- Admin Log - in Unsuccessful - User was not redirected to the admin log-in page. - User still sees the default sign-in page.	Russel Andrade/ March 28,2015				
19-2	Valid Admin Key Combination	In the log-in page : 1.The admin should input U Up, Down,Down, Left,Right, Left,Right,B,A	Upon completion of the steps : - Verify that a message indicating a valid key combination was inputted. - The admin log-in page must be shown - The user must be able to input in the admin log-in page.	- Admin key accepted - The user was redirected to the admin sign-in page. - The user can now sign-in as an admin. - The user can input username and password for the final stage of the admin sign-in process	Russel Andrade/ March 28,2015				
19-3	Valid Admin Log-in	After successfully inputting the correct admin key combination : 1. Input "experts.prime@yahoo.com" in the email field. 2. Input "experts!" in the password field. 3. Click the submit button.	Upon completion of the steps - Verify that the admin page is shown - Verify that the admin can access all admin features	- Admin Sign-in Successful. - The user was redirected to the Company Account Registration. - The admin user can now create company accounts for their partners.	Russel Andrade/ March 28,2015

TEST SCRIPTS

TEST ID : 1 - The User can login to the System through his / her account.					
Designed By : Michael Ramos				Module or Screen :	
Test Data Source :				Objectives : Checks if the System allows the User to login through his / her account.	
Test Case #	Description	Test Steps	Expected Results	Actual Results	Performed By/ Date
01 - 1	Checks that the System will not accept if the email and password fields are empty.	1. In the Login screen the User inputs: Email: Password: 2. Clicks the "Login" button	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	Michael Ramos/ March 30, 2015
01 - 2	Checks that the System will allow leading spaces in email and the password is correct.	1. In the Login screen the User inputs: Email: <space><space><space>sample_email@gmail.com Password: sample_p@ssword! 2. Clicks the "Login" button	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	Michael Ramos/ March 30, 2015

QA Test Script – User Story 1

01 - 3	Checks that the System will allow trailing spaces in email and the password is correct.	<p>1. In the Login screen the User inputs: Email: sample_email@gmail.com<space><space> Password: sample_p@ssword!</p> <p>2. Clicks the "Login" button</p>	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	<ul style="list-style-type: none"> The User will be able to login successfully. The System will direct and display to the User his / her main page. Check that the System will not make the email and password of the User be visible in the page url. 	Michael Ramos/ March 30, 2015
01 - 4	Not allow middle spaces in email and the password is correct.	<p>1. In the Login screen the User inputs: Email: sam<space>ple_email<space>@<space>gmail.com Password: sample_p@ssword!</p> <p>2. Clicks the "Login" button</p>	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "Enter your email address and password." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	Michael Ramos/ March 30, 2015

QA Test Script – User Story 1

01 - 5	Checks that the System will allow the User to login if the email matches with the password in the database.	<p>1. In the Login screen the User inputs: Email: correct_email@gmail.com Password: correct_p@ssword!</p> <p>2. Clicks the "Login" button</p>	<ul style="list-style-type: none"> The User will be able to login successfully. The System should direct and display to the User his / her main page. The System should not make the email and password of the User be visible in the page url. 	<ul style="list-style-type: none"> The User will be able to login successfully. The System should direct and display to the User his / her main page. The System should not make the email and password of the User be visible in the page url. 	Michael Ramos/ March 30, 2015
01 - 6	Checks that the System will not allow the User to login if the entered email does not matches with the entered password using the database or vice versa.	<p>1. In the Login screen the User inputs: Email: correct_email@gmail.com Password: wrong_p@ssword!</p> <p>2. Clicks the "Login" button</p>	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "The email or password you entered is incorrect." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "The email or password you entered is incorrect." The email and password fields should also be highlighted in red. The email and password fields should be editable and should accept new inputs. 	Michael Ramos/ March 30, 2015

QA Test Script – User Story 1

01 - 7	Checks that the System will not allow the User to login if the email field is empty.	<p>1. In the Login screen the User inputs: Email: correct_p@ssword! Password: correct_p@ssword!</p> <p>2. Clicks the "Login" button</p>	<ul style="list-style-type: none"> The User will still be in the Login screen. The System will inform the User a message: "The email or password you entered is incorrect." The email and password fields should also be highlighted in red.
