# TEST SCRIPTS

**TEST ID : 18 -  Admin Login**

**Designed By : Russel Andrade**

**Module or Screen : Admin Login Screen**

**Test Data Source : User data entry**

**Objectives : To test if registered admin can log in to the system.**

| Test Case # | Description | Test Steps | Expected Results | Actual Result | Performed By/ Date |
|---|---|---|---|---|---|
| 18-1 | Invalid Admin Key Combination | In the input admin key page : 1.The admin should input up up, down,left right | Upon completing the steps : - Verify that an error message is shown indicating the invalidity of the key combination. - Verify that the key combination inputted by the user is not valid - The admin log-in page should not be shown | - Admin Log - in Unsuccessful - User was not redirected to the admin log-in page. - User still sees the default sign-in page. | Russel Andrade/ March 28,2015 |
| 18-2 | Valid Admin Key Combination | In the log-in page : 1.The admin should input U Up, Down,Down, Left,Right, Left,Right,B,A | Upon completion of the steps : - Verify that a message indicating a valid key combination was inputted. - The admin log-in page must be shown - The user must be able to input in the admin log-in page. | - Admin key accepted - The user was redirected to the admin sign-in page. - The user can now sign-in as an admin. - The user can input username and password for the final stage of the admin sign-in process | Russel Andrade/ March 28,2015 |
| 18-3 | Valid Admin Log-in | After successfully inputting the correct admin key combination : 1. Input  "experts.prime @yahoo.com" in the email field. 2. Input "experts! " in the password field. 3. Click the submit button. | Upon completion of the steps - Verify that the admin page is shown - Verify that the admin can access all admin features | - Admin Sign-in Successful. - The user was redirected to the Company Account Registration. - The admin user can now create company accounts for their partners. | Russel Andrade/ March 28,2015 |

| 18-4 | Invalid Admin Log-In (All Inputs Wrong) | After successfully inputting the correct admin key combination : 1.Input "russelandrade03 @gmail.com" in the email field. 2.Input "russel03" in the password field 3.Click the submit button | Upon completion of the steps - Verify that the user was not able to successfully log-in as an admin - Verify that an error message indicating that all inputs did not match any correct inputs contained in the database | - Admin Log - in unsuccessful. - The user was notified regarding invalid admin username & password input. - The user was not redirected to the admin page. - The user may opt to input new values for all input fields. | Russel Andrade/ March 28,2015 | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 18-5 | Invalid Admin Log-In (Invalid Password input ) | After successfully inputting the correct admin key combination : 1. Input "applicant2341" in the email field 2. Input "experts" in the password field. 3. Click the submit button | Upon completion of the steps - Verify the admin page must not be shown - Verify that the user was not able to log-in as an admin - Verify that a message saying the password input is wrong . - Verify that a message asking the user to input the password again. | - Admin Log-in unsuccessful. - The user was not able to access the admin page - The user had an option to input new values for all input fields. | Russel Andrade/ March 28,2015 | | | | | | |
| 18-6 | Invalid Admin Log – In (Not Registered) | After successfully inputting the correct admin key combination : 1.Input "applicant241" in the email field. 2.Input "@NotValidPls " in the password field. 3.Click the submit button | Upon completion of the steps - Verify that the user was not able to log-in as an admin - Verify that the user was notified that input values is not registered. | - Admin Log - in unsuccessful. - The user was not redirected to the admin page. - The user had an option to input new values. - The user was notified that he/she may not be registered in the system. | Russel Andrade/ March 28,2015 | | | | | | |
| 18-7 | Valid Admin Log-In (Username & password belongs to one person) | After successfully inputting the correct admin key combination : 1.Input "experts.prime @yahoo.com" in the email field 2.Input "experts!" in the password field 3.Click the submit button | Upon completion of the steps - Verify that the user was able to log-in as an admin - Verify that the user was notifie regarding a successful validation of being a registered admin. | - Admin Log-in successful. - The user was able to access the admin page - The user has access to the admin features. | Russel Andrade/ March 28,2015 | | | | | | |
| 18-8 | Invalid Admin Log-In (Username & Password does not belong to one person) | After successfully inputting the correct admin key combination : 1.Input "experts.prime | Upon completion of the steps - Verify that the user was not able to log-in as an admin - Verify that a message telling | - Admin Log-In Unsuccessful. - The user was not allowed to access the admin page and | Russel Andrade/ March 28,2015 | | | | | | |

| 18-8 | Invalid Admin Log-in (No User Input) | After successfully inputting the correct admin key combination :<br><br>1.Input " " in the username field<br>2.Input " " in the password field.<br>3. Click the submit button | Upon completion of the steps<br>- Verify that the user was not able to log-in as an admin<br>- Verify that a message stating all input fields are blank<br>- The admin page must not be shown. | - Admin Log-In Unsuccessful.<br>- The user was notified that he/she did not entered any input.<br>- He/She was not allowed to access the admin page and its features.<br>- The user had an option to input values for all fields. | Russel Andrade/ March 28,2015 | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 18-9 | Invalid Admin Log-in (One blank input) | After successfully inputting the correct admin key combination :<br><br>1. Input "" in the username field.<br>2. Input "experts!" in the password field.<br>3.Click the submit button | Upon completion of the steps<br>- Verify that the user was not able to log-in as an admin.<br>- Verify that a message stating that the username field must not be left blank<br>- Verify that the admin page is not shown. | - Admin Log-In Unsuccessful.<br>- The user was notified that one of the input does not have any value.<br>- He/She was  not allowe to access the admin page and its features.<br>- The user had an option to input values for the blank field. | Russel Andrade/ March 28,2015 | | | | | | |
| 18-12 | Valid Admin Log-in | After successfully inputting the correct admin key combination :<br><br>1. Input "experts.prime @yahoo.com " in the email field.<br>2. Input "experts!" in the password field.<br>3. Click the submit button | Upon completion of the steps<br>-  Verify that the user was able to successfully log-in as an admin.<br>-  Verify that the details shown on the admin page must be correct. | - Admin page was shown.<br>- Admin E-mail was shown.<br>- The admin Create Company Account was shown. | Russel Andrade/ March 28,2015 | | | | | | |
| 18-12 | Invalid key combination (One of the characters of the key combination is wrong) | In the log-in page :<br>1. Input Up, up, down,down, left, right,left, right, b, c | Upon completion of the steps<br>-  Verify that the admin log-in page is not shown.<br>-   Verify that the log-in page is still shown to the current user. | - Admin Log-in page was not shown.<br>- The user had an option to log-in as an applicant or a company.<br>- The user may input new key combinations. | Russel Andrade/ March 28,2015 | | | | | | |

| 18-13 | Invalid Password input (One of the character in the password is wrong) | In the admin log-in page : 1. Input "experts.prime @yahoo.com" in the email field 2. Input "expert!" in the password field 3. Click the Submit button | Upon completion of the steps - Verify that the user was not able to log-in as an admin - Verify that a message stating that the password input is wrong - Verify that the admin page is not shown. | - Admin Page was not shown. - Admin features was not accessible to the user - The user had an option to re do his/her log-in as an admin. | Russel Andrade/ March 28,2015 | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 18-15 | Cancelled Log-in | In the admin log – in page 1. Input "experts.prime @yahoo.com" in the email field. 2. Input "experts" in the password field. 3. Click the browser refresh button | Upon completion of the steps - Verify that the user was not able to log-in as an admin - Verify that a message informing the user of a cancelled log-in was shown. - Verify that the user is redirected to the main page | - No Effect since there was no cancel feature implemented for the admin log-in page. | Russel Andrade/ March 28,2015 | | | | |
| 18-15 | Cancelled key submit | In the Log – in page : 1. The keys ,Up, Left, Right, Down, Left, Left, Up,Down was pressed 2. User refreshed the browser | Upon completion of the steps - Verify that the user was not able to log-in as an admin - Verify that the admin log-in page was not shown - Verify that the admin page was not shown - Verify that the user was redirected back to the home page. | - Admin log-in unsuccessful. - The user was not able to access the admin page. - The user may opt to re input the admin key combination. - The user may opt to log-in as an applicant or company. | Russel Andrade/ March 28,2015 | | | | |
| 18-16 | Admin Log-in No input value for the password field. | In the Admin Key Log – in 1. Input "ToysRUs " in the username field 2. Input " " in the password field 3. Click the Submit button | Upon completion of the steps - Verify that no new account was made - Verify that the user was notified that the password contained no input - Verify that the user will not able to access | | Russel Andrade/ March 28,2015 | | | | |
| 18-17 | Admin Log-in No input value | In the Admin Key Log-In 1. Input " " in | Upon completion of the Steps - Verify that no input was | | Russel Andrade/ March 28,2015 | | | | |

# TEST SCRIPTS

| | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | | | | |

**TEST ID : 12 – Company Setup**

| Designed By : Jonah Syfu | Module or Screen :Company Setup Profile Page |
|---|---|

| Test Data Source :User data entry | Objectives : To test if registered Companies can edit their profiles. |
|---|---|

| Test Case # | Description | Test Steps | Expected Results | Actual Results | Performed By/ Date | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| 12 - 01 | Valid inputs | In the Company Setup Profile Page, the tester should: <br>1. Enter the following information:<br><br>Company Name:<br>Smart Communications<br>Address: Taft Avenue, Malate, Manila<br>Contact Number: +63 234-2345<br>Company Description: We are Smart.<br><br>2. Press the Submit button. | • Verify if the fields contain valid data types<br>•The image file is accepted<br>•All of the data above is saved into the database<br>•The user is redirected to the main page | - Data Type Validation was evident.<br>- NO Image File Acceptance verification since, that feature is not implemented.<br>- All inputs were stored in the database. | Jonah Syfu/ March 28, 2015 | | | | | |
| 12 - 02 | NO fields are filled. | In the Company Setup Profile Page, the tester should:<br>1. Enter the following information:<br>Company Name: <empty><br>Address: <empty><br>Contact Number: <empty><br>Company Description: <empty><br><br>2. Press the Submit button. | • An error message will appear: "None of the fields are filled."<br>• None of the data will be saved. | - No new data was stored in the database.<br>- A message notifying the user regarding blank fields was evident.<br>- The user can input values for all fields. | Jonah Syfu/ March 28, 2015 | | | | | |

# TEST SCRIPTS

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |

**TEST ID : 1 - The User can login to the System through his / her account.**

| Designed By : Michael Ramos | Module or Screen : |
|---|---|
| Test Data Source : | Objectives : Checks if the System allows the User to login through his / her account. |

| Test Case # | Description | Test Steps | Expected Results | Actual Results | Performed By/ Date |
|---|---|---|---|---|---|
| 01 - 1 | Checks that the System will not accept if the email and password fields are empty. | 1. In the Login screen the User inputs:<br>Email:<br>Password:<br><br>2. Clicks the "Login" button | Upon completing the steps :<br>• The User will still be in the Login screen.<br>• The System will inform the User a message: "Enter your email address and password."<br>• The email and password fields should also be highlighted in red.<br>• The email and password fields should be editable and should accept new inputs. | • The User will still be in the Login screen.<br>• The System will inform the User a message: "Enter your email address and password."<br>• The email and password fields should also be highlighted in red.<br>• The email and password fields should be editable and should accept new inputs. | Michael Ramos/ March 30, 2015 |
| 01 - 2 | Checks that the System will allow leading spaces in email and the password is correct. | 1. In the Login screen the User inputs:<br>Email: <space><space><space> sample_email@gmail.com<br>Password: sample_p@ssword!<br><br>2. Clicks the "Login" button | Upon completing the steps :<br>• The User will be able to login successfully.<br>• The System will direct and display to the User his / her main page.<br>• Check that the System will not make the email and password of the User be visible in the page url. | • The User will be able to login successfully.<br>• The System will direct and display to the User his / her main page.<br>• Check that the System will not make the email and password of the User be visible in the page url. | Michael Ramos/ March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 01 - 3 | Checks that the System will allow trailing spaces in email and the password is correct. | 1. In the Login screen the User inputs:<br>Email: sample_email@gmail.com<space><space><space><br>Password: sample_p@ssword!<br><br>2. Clicks the "Login" button | Upon completing the steps :<br>•　　The User will be able to login successfully.<br>•　　The System will direct and display to the User his / her main page.<br>•　　Check that the System will not make the email and password of the User be visible in the page url. | •　　The User will be able to login successfully.<br>•　　The System will direct and display to the User his / her main page.<br>•　　Check that the System will not make the email and password of the User be visible in the page url. | Michael Ramos/<br>March 30, 2015 |
| 01 - 4 | Not allow middle spaces in email and the password is correct. | 1. In the Login screen the User inputs:<br>Email: sam<space>ple_email<space>@<space>gmail.com<br>Password: sample_p@ssword!<br><br>2. Clicks the "Login" button | Upon completing the steps :<br>•　　The User will still be in the Login screen.<br>•　　The System will inform the User a message: "Enter your email address and password.<br>•　　The email and password fields should also be highlighted in red.<br>•　　The email and password fields should be editable and should accept new inputs. | •　　The User will still be in the Login screen.<br>•　　The System will inform the User a message: "Enter your email address and password.<br>•　　The email and password fields should also be highlighted in red.<br>•　　The email and password fields should be editable and should accept new inputs. | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| 01 - 5 | Checks that the System will allow the User to login if the email matches with the password in the database. | 1. In the Login screen the User inputs:<br>Email: correct_email@gmail.com<br><br>Password: correct_p@ssword!<br><br>2. Clicks the "Login" button | •	The User will be able to login successfully.<br>•	The System should direct and display to the User his / her main page.<br>•	The System should not make the email and password of the User be visible in the page url. | •	The User will be able to login successfully.<br>•	The System should direct and display to the User his / her main page.<br>•	The System should not make the email and password of the User be visible in the page url. | Michael Ramos/<br>March 30, 2015 |
| 01 - 6 | Checks that the System will not allow the User to login if the entered email does not matches with the entered password using the database  or vice versa. | 1. In the Login screen the User inputs:<br>Email: correct_email@gmail.com<br><br>Password: wrong_p@ssword!<br><br>2. Clicks the "Login" button | •	The User will still be in the Login screen.<br>•	The System will inform the User a message: "The email or password you entered is incorrect."<br>•	The email and password fields should also be highlighted in red.<br>•	The email and password fields should be editable and should accept new inputs. | •	The User will still be in the Login screen.<br>•	The System will inform the User a message: "The email or password you entered is incorrect."<br>•	The email and password fields should also be highlighted in red.<br>•	The email and password fields should be editable and should accept new inputs. | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| 01 - 7 | Checks that the System will not allow the User to login if the email field is empty. | 1. In the Login screen the User inputs:<br>Email:<br>Password: correct_p@ssword!<br><br>2. Clicks the "Login" button | • The User will still be in the Login screen.<br>• The System will inform the User a message: "The email or password you entered is incorrect."<br>• The email and password fields should also be highlighted in red.<br>• The email and password fields should be editable and should accept new inputs. | • The User will still be in the Login screen.<br>• The System will inform the User a message: "The email or password you entered is incorrect."<br>• The email and password fields should also be highlighted in red.<br>• The email and password fields should be editable and should accept new inputs. | Michael Ramos/<br>March 30, 2015 |
| 01 - 8 | Checks that the System will not allow if the password field is empty. | 1. In the Login screen the User inputs:<br>Email: correct_email@gmail.com<br><br>Password:<br><br>2. Clicks the "Login" button | • The User will still be in the Login screen.<br>• The System will inform the User a message: "Enter your password."<br>• The password field should also be highlighted in red.<br>• The email and password fields should be editable and should accept   new inputs. | • There was a run-time error. | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| 01 - 8 | Checks that the System will allow simultaneous login of multiple different Users on different web browsers. | 1. In the Login screen the User inputs:<br>FIREFOX (User 1)<br>Email: correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>GOOGLE CHROME (User 2)<br>Email: correct_email2@gmail.com<br><br>Password: correct_p@ssword2!<br><br>2. Clicks the "Login" button | • The two Users should be able to login successfully.<br>• The System should direct and display to each of the Users their own respective main pages.<br><br>• The System should not make the emails and passwords of the two Users be visible in the page url of both browsers. | • The two Users should be able to login successfully.<br>• The System should direct and display to each of the Users their own respective main pages.<br><br>• The System should not make the emails and passwords of the two Users be visible in the page url of both browsers. | Michael Ramos/<br>March 30, 2015 |
| 01 - 9 | Checks that the System will allow simultaneous login of the same User on different web browsers. | 1. In the Login screen the User inputs:<br>FIREFOX (User 1)<br>Email: correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>GOOGLE CHROME (User 1)<br>Email: correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>2. Clicks the "Login" button | • The User should be able to login successfully on both web browsers.<br>• The System should direct and display to the User to his / her main pages on both browsers.<br>• The System should not make the emails and passwords of the User be visible in the page url on both browsers. | • The User should be able to login successfully on both web browsers.<br>• The System should direct and display to the User to his / her main pages on both browsers.<br>• The System should not make the emails and passwords of the User be visible in the page url on both browsers. | Michael Ramos/<br>March 30, 2015 |
| 01 - 12 | Checks that the System will allow login of two different Users on different web browsers though not necessarily simultaneous. | 1. In the Login screen the User inputs:<br>FIREFOX (User 1)<br>Email: | • The two Users should be able to login successfully.<br>• The System should direct and display to each of the Users | • The two Users should be able to login successfully.<br>• The System should direct and display to each of the Users | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 01 - 12 | Checks that the System will allow login of the same User on different web browsers though not necessarily simultaneous. | 1. In the Login screen the User inputs:<br>FIREFOX (User 1)<br>Email:<br>correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>GOOGLE CHROME (User 1)<br>Email:<br>correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>2. Clicks the "Login" button | •      The two Users should be able to login successfully.<br>•      The System should direct and display to each of the Users their own respective main pages.<br><br>•      The System should not make the emails and passwords of the two Users be visible in the page url on both browsers. | •      The two Users should be able to login successfully.<br>•      The System should direct and display to each of the Users their own respective main pages.<br><br>•      The System should not make the emails and passwords of the two Users be visible in the page url on both browsers. | Michael Ramos/<br>March 30, 2015 |
| 01 - 13 | Checks that the System will not allow to login if the password entered contain extra spaces. | 1. In the Login screen the User inputs:<br>Email:<br>correct_email1@gmail.com<br><br>Password:<br><space>correct_p@ssword1!<space><space><br><br>2. Clicks the "Login" button | •      The User will still be in the Login screen.<br>•      The System will inform the User a message: "The email or password you entered is incorrect."<br>•      The email and password fields should also be highlighted in red.<br>•      The email and password | •      The User was able to login successfully. | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 01 - 15 | Checks that the System will not allow a User to login using a direct url without logging into application. | 1. In the Login screen the User inputs:<br>FIREFOX<br>Email:<br>correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br>Url:<br>http://JobIT.com/client=#/Profile=John/webhp?sourceid=chrome-instant&ion=1&espv=2&es_th=1&ie=UTF-8#q=importance%20of%20 software%20negineering&es_th=1<br><br>[Copies the url and paste it in GOOGLE CHROME...] | •     The User should not be able to login successfully.<br>•     The System should direct and display the User to the home page of the website. | •     The User should not be able to login successfully.<br>•     The System should direct and display the User to the home page of the website. | Michael Ramos/<br>March 30, 2015 |
| 01 - 15 | Checks that the System will not allow a User to login if it's already logged in on that same web browser on the same window. | 1. In the Login screen the User inputs:<br>FIREFOX<br>Email:<br>correct_email1@gmail.com<br><br>Password: correct_p@ssword1!<br><br>[Opens a new tab and go to login page...] | •     The System should direct and display the Users his / her own main page. | •     The System should direct and display the Users his / her own main page. | Michael Ramos/<br>March 30, 2015 |

| | | | | |
|---|---|---|---|---|
| 01 - 16 | Checks that the System will not allow the password to be copied and pasted. | 1. In the Login screen the User inputs:<br>FIREFOX<br>Email:<br>correct_email1@gmail.com<br><br>Password: ***********<br><br>[Copies the contents of password field and pastes its contents to another screen] | •    The System should not allow the password to be copied and pasted. | •    The System should not allow the password to be copied and pasted. | Michael Ramos/ March 30, 2015 |

# TEST SCRIPTS

TEST ID : 6 - The Applicant can create an account to gain access to the System.

Designed By : Michael Ramos

Module or Screen :

Test Data Source :

Objectives : Checks if the System allows the User to create an account to gain access to the System.

| Test Case # | Description | Test Steps | Expected Results | Actual Results | Performed By/ Date |
|---|---|---|---|---|---|
| 06 - 1 | Checks that the System will not accept if at least one or more required fields are empty. | 1. In the Registration screen the user inputs: ID Number: *First Name: Sonia Middle Name: Reyes *Last Name: *Birth Month: May *Birth Day: 8 *Birth Year: 1887 Cell Number: 08288662350 *Address: *Marital Status: Single *Gender: Female *Email: sonia_reyes_ong@omgterror.com *Password: 12345 *Confirm Password: 12345<br><br>2. Clicks "Create Account" button | • The User will still be in the Registration screen.<br>• The System will not reset all fields entered correctly by the User instead just the wrong ones.<br>• The System will inform the User a message: "Enter all the required fields."<br>• The empty required fields should also be highlighted in red.<br>• The empty required fields should be editable and should accept new inputs. | • The User will still be in the Registration screen.<br>• The System will not reset all fields entered correctly by the User instead just the wrong ones.<br>• The System will inform the User a message: "Enter all the required fields."<br>• The empty required fields should also be highlighted in red.<br>• The empty required fields should be editable and should accept new inputs. | Michael Ramos/ March 30, 2015 |
| 06 - 2 | Checks that the System will allow if the cell phone number entered includes country code. | 1. In the Registration screen the user inputs:<br><br>ID Number: *First Name: Sonia Middle Name: Reyes *Last Name: Ong *Birth Month: May | • The User should be able to register successfully.<br>• The System will inform the User a message: "Registration Successful"<br>• The System will now direct the User to the Set Up | • The User was not able to register successfully. | Michael Ramos/ March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 06 - 3 | Checks that the System will allow if the cell phone number entered does not include the first digit "0". | 1. In the Registration screen the user inputs:<br><br>ID Number:<br>*First Name: Sonia<br>Middle Name: Reyes<br>*Last Name: Ong<br>*Birth Month: May<br>*Birth Day: 8<br>*Birth Year: 1887<br>Cell Number: 8288662350<br>*Address: Malate, Manila<br>*Marital Status: Single<br>*Gender: Female<br>*Email: sonia_reyes_ong@omgterror.com<br>*Password: 12345<br>*Confirm Password: 12345<br><br>2. Clicks "Create Account" button | •    The User should be able to register successfully.<br>•    The System will inform the User a message: "Registration Successful"<br>•    The System will now direct the User to the Set Up page in order to complete the profile of the User. | •    The User was not able to register successfully. | Michael Ramos/<br>March 30, 2015 |
| 06 - 4 | Checks that the System will allow if the cell phone number entered includes the first digit "0". | 1. In the Registration screen the User inputs:<br>ID Number:<br>*First Name: Sonia<br>Middle Name: Reyes<br>*Last Name: Ong<br>*Birth Month: May<br>*Birth Day: 8<br>*Birth Year: 1887<br>Cell Number: 08288662350 | •    The User should be able to register successfully.<br>•    The System will inform the User a message: "Registration Successful"<br>•    The System will now direct the User to the Set Up page in order to complete the profile of the User. | •    The User should be able to register successfully.<br>•    The System will inform the User a message: "Registration Successful"<br>•    The System will now direct the User to the Set Up page in order to complete the profile of the User. | Michael Ramos/<br>March 30, 2015 |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 06 - 5 | Checks that the System will not allow if the email address contains spaces in between. | 1. |---|---|---|---|---|
| | | | | |
| 3 - 21 | Checks if the software will not allow password change if the user is not registered. | In the new password field, the user must input :<br><br>(No Possible Input) | Password Change Unsuccessful.<br>User should not have any access to the change password page.<br>User will be notified that he/she must be registered in the system to change a current  password. | | |

# TEST SCRIPTS

TEST ID :  4 / The User can choose how to receive notifications.

Designed By : Michael Ramos

Module or Screen :

Test Data Source : User Data Entry

Objectives :
To check if the system allows the user to choose his/ her mode of notification.

| Test Case # | Description | Test Steps | Expected Results | Actual Results | Performed By/ Date |
|---|---|---|---|---|---|
| 4 - 1 | Checks that the System will not allow the User to go to the page using direct url without logging into application | In the browser, the tester type the direct url without logging into application:<br>1.      Enter "http://jobit.php/ edit_notifications.php" as url. | Upon completing the steps on the left, the Login Screen should be displayed.<br>•      The tester will be prompted to login. | | |
| 4 - 2 | Checks that the System will not allow the User to choose how to receive notifications if the password field is empty. | After having successfully login, the tester  should be able to see his profile page:<br>1.      Clicks the "Settings" button. | Upon completing the steps on the left, the tester should still be prompted to input his / her password again.<br>•      Verify that the following | | |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | |
| 4 - 3 | Checks that the System is password space-sensitive. | After having successfully login, the tester should be able to see his profile page:<br>1.     Clicks the "Settings" button.<br>2.     Clicks the "Edit Account" button.<br>3.     Enters password with spaces in between characters. | Upon completing the steps on the left, the tester should still be prompted to input his / her password again.<br>•     Verify that the following error message is shown: "Incorrect Password"<br>•     Verify that the Password field is highlighted in red. | | |
| 4 - 4 | Checks that the System will not allow the password to be copied and pasted. | After having successfully login, the tester should be able to see his profile page:<br>1.     Clicks the "Settings" button. | Upon completing the steps on the left, the tester should still be able to enable / disable options.<br>•     Verify that the tester | | |

| | | | | |
|---|---|---|---|---|
| | | | | |
| 4 - 5 | Checks if the system can allow the user enable a notification mode. | After having successfully login, the tester should be able to see his profile page:<br>1.      Clicks the "Settings" button.<br>2.      Clicks the "Edit Account" button.<br>3.      Enters password.<br>4.      Enable options. | Upon completing the steps on the left, the tester should still be able to enable / disable options.<br>•      Verify that the tester should enable options. | | |
| 4 - 6 | Checks if the system can allow the user disable a notification mode. | After having successfully login, the tester should be able to see his profile page:<br>1.      Clicks the "Settings" button. | Upon completing the steps on the left, the tester should still be able to enable / disable options.<br>•      Verify that the tester | | |
